Database Developer

About Valeyo

Valeyo is a leading Canadian-based solutions provider, partnering to deliver a full suite of business solutions, including lending technology, insurance products and services, to financial institutions nationwide. At Valeyo, we are focused on bringing together the right products, solutions, and services to help our partners thrive. And for more than 40 years, clients have trusted Valeyo to be their go-to provider based on the strength of our proprietary products, strategic partnerships, and people.

At Valeyo you will be part of an innovative, dynamic, and purpose-driven organization, and empowered to succeed through opportunities for professional growth and development. Our core values of accountability, partner-centricity, teamwork & collaboration, results-orientation, integrity, and passion are embedded across everything we do and guide our actions and decisions. Valeyo has head offices in Toronto, ON., and Burnaby, BC., with national presence through remote workforce and field offices.

The Role

We are currently seeking a Database Developer for a contract (One-Year) position who will work within our Lending and/or Insurance technologies designing/modelling and optimizing our SQL databases as well as building out features and helping guide our platform roadmaps. The successful incumbent will have expert knowledge of agile software methodologies and solid experience designing and modelling relational databases. This role will report to the Enterprise Architect.

What you'll be doing

- Work closely with Product Manager and other Subject Matter Experts to interpret requirements and translate them to software solutions.
- Develop technical design and software architecture documentation
- Create and/or optimize ETLs, triggers, functions and stored procedures
- Create Proof of Concepts (POC), and prototypes that illustrate current and future workflows and product design
- Develop data models, including relationships and indexes
- Work with the Quality Assurance team to review test plans, test scenarios, and test cases
- Plan and execute full software development life cycles (SDLC) for each assigned project, adhering to company standards and expectations
- Participate in efforts to improve software development life cycle processes
- Conducting meetings and presentations to share ideas and findings

valeyo

What you'll bring

- 5+ years of previous experience in database development of scalable web-based applications
- BS in Computer Science or related field preferred
- In-depth knowledge and experience in the Microsoft technology stack (specifically SQL server)
- Experience working within an agile development process (Scrum and backlog management tools)
- Experience in financial services and lending considered a definite asset
- Able to take feedback constructively and iterate on ideas and solutions from multiple stakeholders with differing opinions
- Meticulous thinker who can effectively work out all the details when presented with big ideas
- Understanding of user-centric design
- Excellent written and verbal communication skills
- Must demonstrate the ability to explain technical concepts to a non-technical audience
- Ability to communicate effectively with all stakeholders
- Demonstrated ability to analyze problems and identify re-usable components within a solution
